My Prescription for Savings

Rx

It’s time for Congress to take meaningful action to lower prescription drug costs with the Prescription for Savings. Patients win when market-based competition from FDA-approved generics and biosimilars deliver savings at the pharmacy counter.

- Clear the way for biosimilars in the U.S.
- Combat patent abuse by brand-name drug companies
- Pass the CREATE Act to end the shenanigans
- Reduce the out-of-pocket costs for low-income seniors
- Eliminate the penalty on generics in Medicaid
- Increase access to affordable medicines in trade agreements
