This awareness campaign highlights the role that middlemen play in running up the prices that America’s patients pay for their generic prescription drugs. The microsite MarkupMadness.org highlights egregious markups on generic medicines and provides resources for understanding the problem and achieving solutions that will help level the playing field. Use this social toolkit to help us spread the word through your digital and social media networks.

#MarkupMadness
Who’s Profiting from Your Prescription?
#MarkupMadness

Background

Over the past 10 years generic and biosimilar medicines have saved the U.S. health care system and taxpayers nearly $2.4 trillion. This campaign uses data to show that middlemen profit-taking jeopardizes this patient savings and access. We have developed this toolkit for AAM members, patient advocacy groups, patients and other champions of the patient savings and access to share these educational materials and AAM’s policy solutions.

Key Takeaway

Patients are benefiting from generic medicines, but middlemen profit-taking threatens sustained patient savings and access.

Timeline

The campaign launched in March and will run through the end of May 2022.

How can I help?

• Follow AAM and the Biosimilar Council on Twitter, LinkedIn, Facebook and Instagram:
  @AccessibleMeds
  @BiosimsCouncil

• Retweet, share, like and/or comment on posts from AAM and the Biosimilars Council

• Create your own content with the assets in this toolkit

• Include the campaign description and link to the microsite https://markupmadness.org in your communication channels

• Use the following hashtags:
  #MarkupMadness
  #drugprices
  #drugpricing
  #PatientAccess
Community Activation

On April 1, we invite everyone to create a “Twitter Storm” to draw media attention. We are asking that all supporters tweet the same message and change their Twitter or LinkedIn profile cover photo and profile image.

Social Message

This is #MarkupMadness. Stop middlemen from adding to the cost of the generic prescription medicines millions of America’s patients rely on each day to manage their health! https://markupmadness.org

What content can I share?

All the image assets in this toolkit can downloaded here.

If you need assistance, please contact AAM Senior Marketing Director Erica Klinger at Erica.Klinger@accessiblemeds.org.

Middlemen Are Marking Up Your Generics

Take a look at the list of commonly prescribed generic medicines below and note the gap between what generic drug makers charge for their medicines (to others in the supply chain) and what patients might pay if they chose to only use just cash when filling their prescription at the pharmacy. This is #MarkupMadness.
