

Risk Evaluation and Mitigation Strategies (REMS) for Generic Drugs: Best Practices for Proposed REMS Submissions

CAPT Stacy Barley, REMS Team Lead

Division of Clinical Safety and Surveillance
Office of Safety and Clinical Evaluation
Office of Generic Drugs
Center for Drug Evaluation and Research
U.S. Food and Drug Administration
GRx+Biosims 2024

Learning Objectives

What is a REMS?

- Define a REMS and REMS requirements

Types of REMS Submissions

- Describe development of Shared System (SS) REMS with a Drug Master File (DMF) vs. without a DMF, and
- Separate Comparable REMS

Effective Communication

- Communicate with FDA regarding the status of your REMS
- Communicate with the applicable reference listed drug holder regarding a shared system REMS

What is a REMS?

The Food and Drug Administration Amendments Act (FDAAA) of 2007, under Section 901 requires applicants to:

1. Develop and comply with REMS under section 505-1 of the Federal Food, Drug, and Cosmetic Act (FD&C Act).
2. Develop a risk management plan beyond the labeling to ensure the benefits of a drug outweigh known risks.
3. Generally, focuses on communicating to patients, communicating to health care providers and may include required activities or clinical interventions before the drug can be prescribed, dispensed or received.

When is a REMS Necessary?

Consideration of the following factors:

- Seriousness of the known or potential adverse events
- Expected benefit of the drug
- Seriousness of the disease
- Whether the drug is new [i.e., a new molecular entity (NME)]
- Expected duration of treatment
- Size of the population likely to use the drug

REMS: FDA's Application of Statutory Factors in Determining When a REMS Is Necessary

REMS Submission Requirement

FDA may require a REMS:

Pre-Approval

FDA determines a REMS is necessary to ensure the benefits of the drug outweigh the risk(s)

Post-Approval

FDA becomes aware of new safety information and determines that a REMS is necessary to ensure the benefits of the drug outweigh the risk(s)

REMS Requirements for ANDAs

If the Reference Listed Drug (RLD) has a REMS, then all ANDAs must also have a REMS using one of the following options:

- Work with the RLD to develop a **new Single, Shared System REMS**
- Join an already existing Shared System REMS
- Pursue a *separate*, comparable system from the Shared System REMS and work *independently* from the RLD

Development of a Shared System REMS Guidance for Industry

DRAFT GUIDANCE

This guidance document is being distributed for comment purposes only.

Comments and suggestions regarding this draft document should be submitted within 60 days of publication in the *Federal Register* of the notice announcing the availability of the draft guidance. Submit electronic comments to <https://www.regulations.gov>. Submit written comments to the Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number listed in the notice of availability that publishes in the *Federal Register*.

For questions regarding this draft document, contact (CDER), Lubna Merchant, Office of Surveillance and Epidemiology, at 301-796-5162 or (CBER) Office of Communication, Outreach and Development, 800-835-4709 or 240-402-8010.

REMS: Important Reminders

- Know your product! Access the [REMS@FDA website](#) to determine if the RLD or Reference Standard (RS) has a REMS
- Search for and review the latest REMS guidances in advance of your submission (see Resources Slide)
- A REMS Pre-Approval Notification Letter (RNL) is sent to the applicant **after** the application is accepted for review
- A REMS proposal is not required at initial ANDA filing, but a statement of intent regarding the REMS is recommended
- If resubmitting after a Complete Response action, the REMS proposal should be part of the resubmission

What to Submit

Submit a full REMS proposal:

- If there is no Type V DMF
- If you do not plan to work with the RLD
- Submission of REMS proposal must be very detailed (noted on next slide)

Using Type V DMF REMS:

- Best option!!
- Only need to submit a cover letter and letter of authorization (LOA) to ANDA file (no full REMS proposal needed)
- LOA must also be in the DMF

REMS Submissions: Full REMS Proposal

Proposed REMS submission includes:

1. REMS (REMS document and REMS materials)
2. REMS Supporting Document

Submission Instructions for each Applicant (No REMS DMF):

- Initial submission (REMS Proposal) - **“PROPOSED REMS for ANDA #####”**
- Subsequent submissions (REMS Amendment) - **“PROPOSED REMS for ANDA ##### - AMENDMENT”**
- REMS document submitted in Structured Product Labeling (SPL) format

Communication is Key to Success

Communicating with the FDA

- Review your Pre-Approval REMS Notification Letter (RNL)
- Submit disclosure Authorization letter (if applicable)
- Attend Kick-off Meeting scheduled by FDA for RLD, and generic drug applicant(s)
- Submit biweekly updates
- Contact the REMS Coordinator listed in your Pre-Approval RNL if you need help

Communicating with the RLD

- Reach out to the RLD as soon as you receive your Pre-Approval RNL
- Collaborate early to develop a Shared System REMS or obtain a LOA to a REMS DMF
- Review the FDA REMS website frequently throughout your review to ensure there are no REMS updates to the RLD or existing SS REMS

REMS Public Dashboard (NEW)

Persons with disabilities having problems accessing the PDF file(s) below may call (301) 796-3634 for assistance.

The Food and Drug Administration Amendments Act of 2007 gave FDA the authority to require a Risk Evaluation and Mitigation Strategy (REMS) from manufacturers to ensure that the benefits of a drug or biological product outweigh its risks.

The table below provides links to currently approved individual and shared system REMS.

Information on historical and released REMS is available in downloadable: data files.
